TDS 158-ULTRAMAT JUNE-2023

# **ULTRAMAT**

## **SALES FORMAT**

15L, 4L

# **DESCRIPTION**

TKROM ULTRAMAT is a paint with exceptional opacity, levelling and washability properties (CLASS 1). It is especially suitable for painting very large and bright areas that require a matt finish without reflections. Its formulation incorporates the anti-splash rheological innovation of tkrom paints, which reduces splashing by up to 80% compared to conventional paint. Pleasant aroma. Low levels of VOCs.

## **SCOPE OF APPLICATION**

Indoor/Outdoor. For all types of wall surfaces, especially in smooth finishes, to which it gives a great beauty thanks to its total matt appearance, without reflections. Masonry surfaces. Highly decorative finishes. Do-it-yourself in general.

## **PROPERTIES**

- •Deep matt
- •Anti-spatter technology
- Excellent reviews
- Excellent washability
- Excellent applicability
- Excellent levelling
- •Excellent performance
- •Excellent coverage

Contains preservative ANTIMOLD

# **TECHNICAL DATA**

TDS 158-ULTRAMAT JUNE-2023

### PREPARATION OF THE SUBSTRATE

#### **GENERAL**

The surface must be compact, dry, free of dust, salts, loose or poorly adhered parts or any type of contamination that may affect the adhesion of the system. The resistance of the substrate must be checked. Regardless of the substrate to be painted, the appearance must be homogenised and any differences in texture, gloss, absorption, etc. must be corrected.

### **NEW WORK**

Type of substrate: plaster mortar, plasterboard, concrete, fibre cement and other building materials. Substrates in normal conditions: it is not necessary to apply a primer coat beforehand. Very porous and/or absorbent substrates: apply a coat of primer TKROM FIJATIVO F4, TKROM FIJATIVO AL AGUA PLIOTEC or TKROM FIJATIVO F10 BLANCO, in order to avoid excessive absorption in subsequent painting. Smooth surfaces with low absorbent power: apply a primer coat of TKROM FIJATIVO F1. In cases where the absorbent power of the substrate is very low, it is recommended to sand the surface to open the pores.

#### **RESTORATION AND MAINTENANCE**

Painted surfaces: materials in poor condition must be completely removed and the areas repaired until a sound, dry and clean substrate is obtained. Aged paintwork: it is advisable to apply a primer coat of TKROM FIJATIVO F1, in order to strengthen the outer layer by creating a resin grid that also allows transpiration, reduces absorption and facilitates subsequent painting. Aged, unpainted surfaces: the resistance of the substrate must be checked. For powdery, sandy and/or very absorbent surfaces, apply a coat of primer TKROM FIJATIVO F4, TKROM FIJATIVO AL AGUA PLIOTEC or TKROM FIJATIVO F10 BLANCO in order to regularise and fix the substrate. Substrates with microorganisms: remove mould and/or fungus by wet cleaning, apply one to two coats of TKROM LIMPIADOR REFORZANTE, leaving 12 hours between coats. If the substrate is very damaged, it is advisable to apply a coat of primer TKROM IMPRIMACIÓN SELLADORA-SANEADORA, following the manufacturer's instructions. Surfaces with efflorescence: remove efflorescence and alkalinity by means of suitable treatments, apply a coat of TKROM FIJATIVO F1 primer.

### **APPLICATION SYSTEM**

| SYSTEM  | PRODUCT                                      | PERFORMANCE      | DILUTION                              | LAYERS |
|---|--|------------------|---------------------------------------|--------|
| PRIMING  (very porous substrates, unpainted aged surfaces, substrates with efflorescence) | TKROM FIJATIVO F4                            | 14-18 m2/L layer | 1:4 water                             | 1 o 2  |
|   | TKROM FIJATIVO<br>F10 BLANCO                 | 14-18 m2/L layer | No dilution                           | 1 o 2  |
|   | TKROM FIJADOR AL<br>AGUA PLIOTEC             | 10-14 m2/L layer | No dilution                           | 1 o 2  |
| <b>PRIMING</b> (Surfaces with low absorbency, aged paints)                                | TKROM FIJATIVO<br>PENETRANTE F1              | 14-18 m2/L layer | 1:1 water                             | 1 o 2  |
| PRIMING (Carriers with micro-organisms)   | TKROM LIMPIADOR<br>REFORZANTE                | N.A              | No dilution                           | 1 o 2  |
|   | TKROM IMPRIMACIÓN<br>SELLADORA-<br>SANEADORA | 14-18 m2/L layer | No dilution                           | 1 o 2  |
| FINISH  | TKROM ULTRAMAT                               | 10-12 m2/L layer | 0-10% Depending on application system | 1 o 2  |

TDS 158-ULTRAMAT JUNE-2023

### **CONDITIONS OF APPLICATION**

Min. +5°C / Max. +35°C Substrate Temp.

5°C / 35°C **Ambient Temperature** 

Cont. Humidity Substrate Dry substrate with humidity < 5%. Cement mortars, allow to set completely (28 days

minimum). Cementitious based products, allow to dry for at least 4 days before coating.

**Dew Point** The substrate temperature must be at least 3°C above the dew point to reduce the risk

of detachment or efflorescence.

## RECOMMENDATIONS FOR IMPLEMENTATION

Method of application Brush, roller and spray.

**Preparation** Shake to homogenise the product. Adjust viscosity with water. It is advisable to apply the

second coat of the product perpendicular to the first coat to achieve optimum opacity.

Maintenance It is not recommended to wash surfaces within 28 days of application.

#### RECOMMENDATIONS FOR IMPLEMENTATION

Health and safety

For any information concerning safety issues in the use, storage, transport and disposal of this product, users should consult the labelling and the most recent version of the product's MSDS, which contains the safety, ecological and toxicological information on the product.

LER CODE: 08 01 12. WASTE: NON-HAZARDOUS

**Storage** The stability of the product in its original unopened containers, at ambient temperatures

of not more than 30°C and not less than 5°C, shall be 24 months from the date of manufacture. Storage shall be in a cool, dry place, in their original containers, well closed,

undamaged and protected from frost and direct sunlight.

**Tariff heading** TARIC code: 3209 10 00

Note The technical information given in this document, as well as the recommendations

concerning the application and use of the product, are given in good faith, with data based on current knowledge of the product, laboratory tests and practical use under normal conditions of storage, handling and application. Complete reproducibility of the stated data for each individual use is not guaranteed. The user of the product should test

the suitability of the product in accordance with the end use of the product.
